

# Want Field Advantage? Go **Green**

You think you already do EVERYTHING  
you can to help the environment?  
**Fredericton Ultimate**  
is going to help you do even more!

We are proud to introduce the **CARBON-FLIP**

What's the Carbon-Flip? Typically, before each game, captains simply flip the disc to see who has the choice to either be on offense/defense, pick an end-zone or choose jersey color. With the Carbon-flip, the captains will instead total up the number of vehicles their team brought to the field... The team with the smaller number wins the flip. If there is a tie, a regular flip will be used.

Whether you carpool because of the bridge closure, to support the City's initiative regarding alternative-transit or because you are simply an environment-conscious individual, the result will be the same... less emissions!

**Reduce Your Carbon Footprint**
